

YOUR FRESHA ACCOUNT COULD BE **HOLDING REVENUE** YOU HAVEN'T COLLECTED YET.

Here's how we'd turn it into a client return system.

MOST BUSINESSES USE FRESHA LIKE A DIARY.

The **opportunity** is
what happens **after the appointment.**

FIRST, WE FIND WHERE REVENUE IS **LEAKING**.

Booked

Attended

What
Happens Next?

5 LEAK POINTS WE UNCOVER

Didn't
rebook

Cancelled

No-showed

Went
inactive

Wanted a slot
that wasn't
available

Every one is a recovery opportunity.

1. TURN TODAY'S APPOINTMENT INTO THE NEXT ONE.

Don't leave rebooking to chance.

2. STOP CANCELLATIONS BECOMING EMPTY CHAIRS.

**That gap doesn't
automatically have to become £0.**

3. FIND THE CLIENTS WHO QUIETLY DISAPPEARED.

60 days quiet?

Different message

90 days quiet?

Different message

High-value regular suddenly missing?

Different treatment entirely

Not 'send everyone an offer'.
Send the right reason to return.

4. REDUCE PREVENTABLE NO-SHOWS.

Every protected appointment
protects revenue.

5. GIVE QUIET HOURS A JOB.

Busy Tuesday 2pm

Leave it alone

Quiet Wednesday 11am

Give clients a reason
to choose it

Discount **the problem**,
not the whole business.

THEN WE TURN THE FEATURES INTO **A SYSTEM.**

Software gives you tools.
The system decides what happens,
when, and why.

YOU MIGHT NOT NEED MORE LEADS.

You might need more of your
existing clients to come back.

Retention **School**

Practical retention systems for
appointment-led businesses.

Already using Fresha?

We'd start with rebooking, inactive
clients and gap recovery.
