

# Your booking reminder cannot do the job of a rebooking email

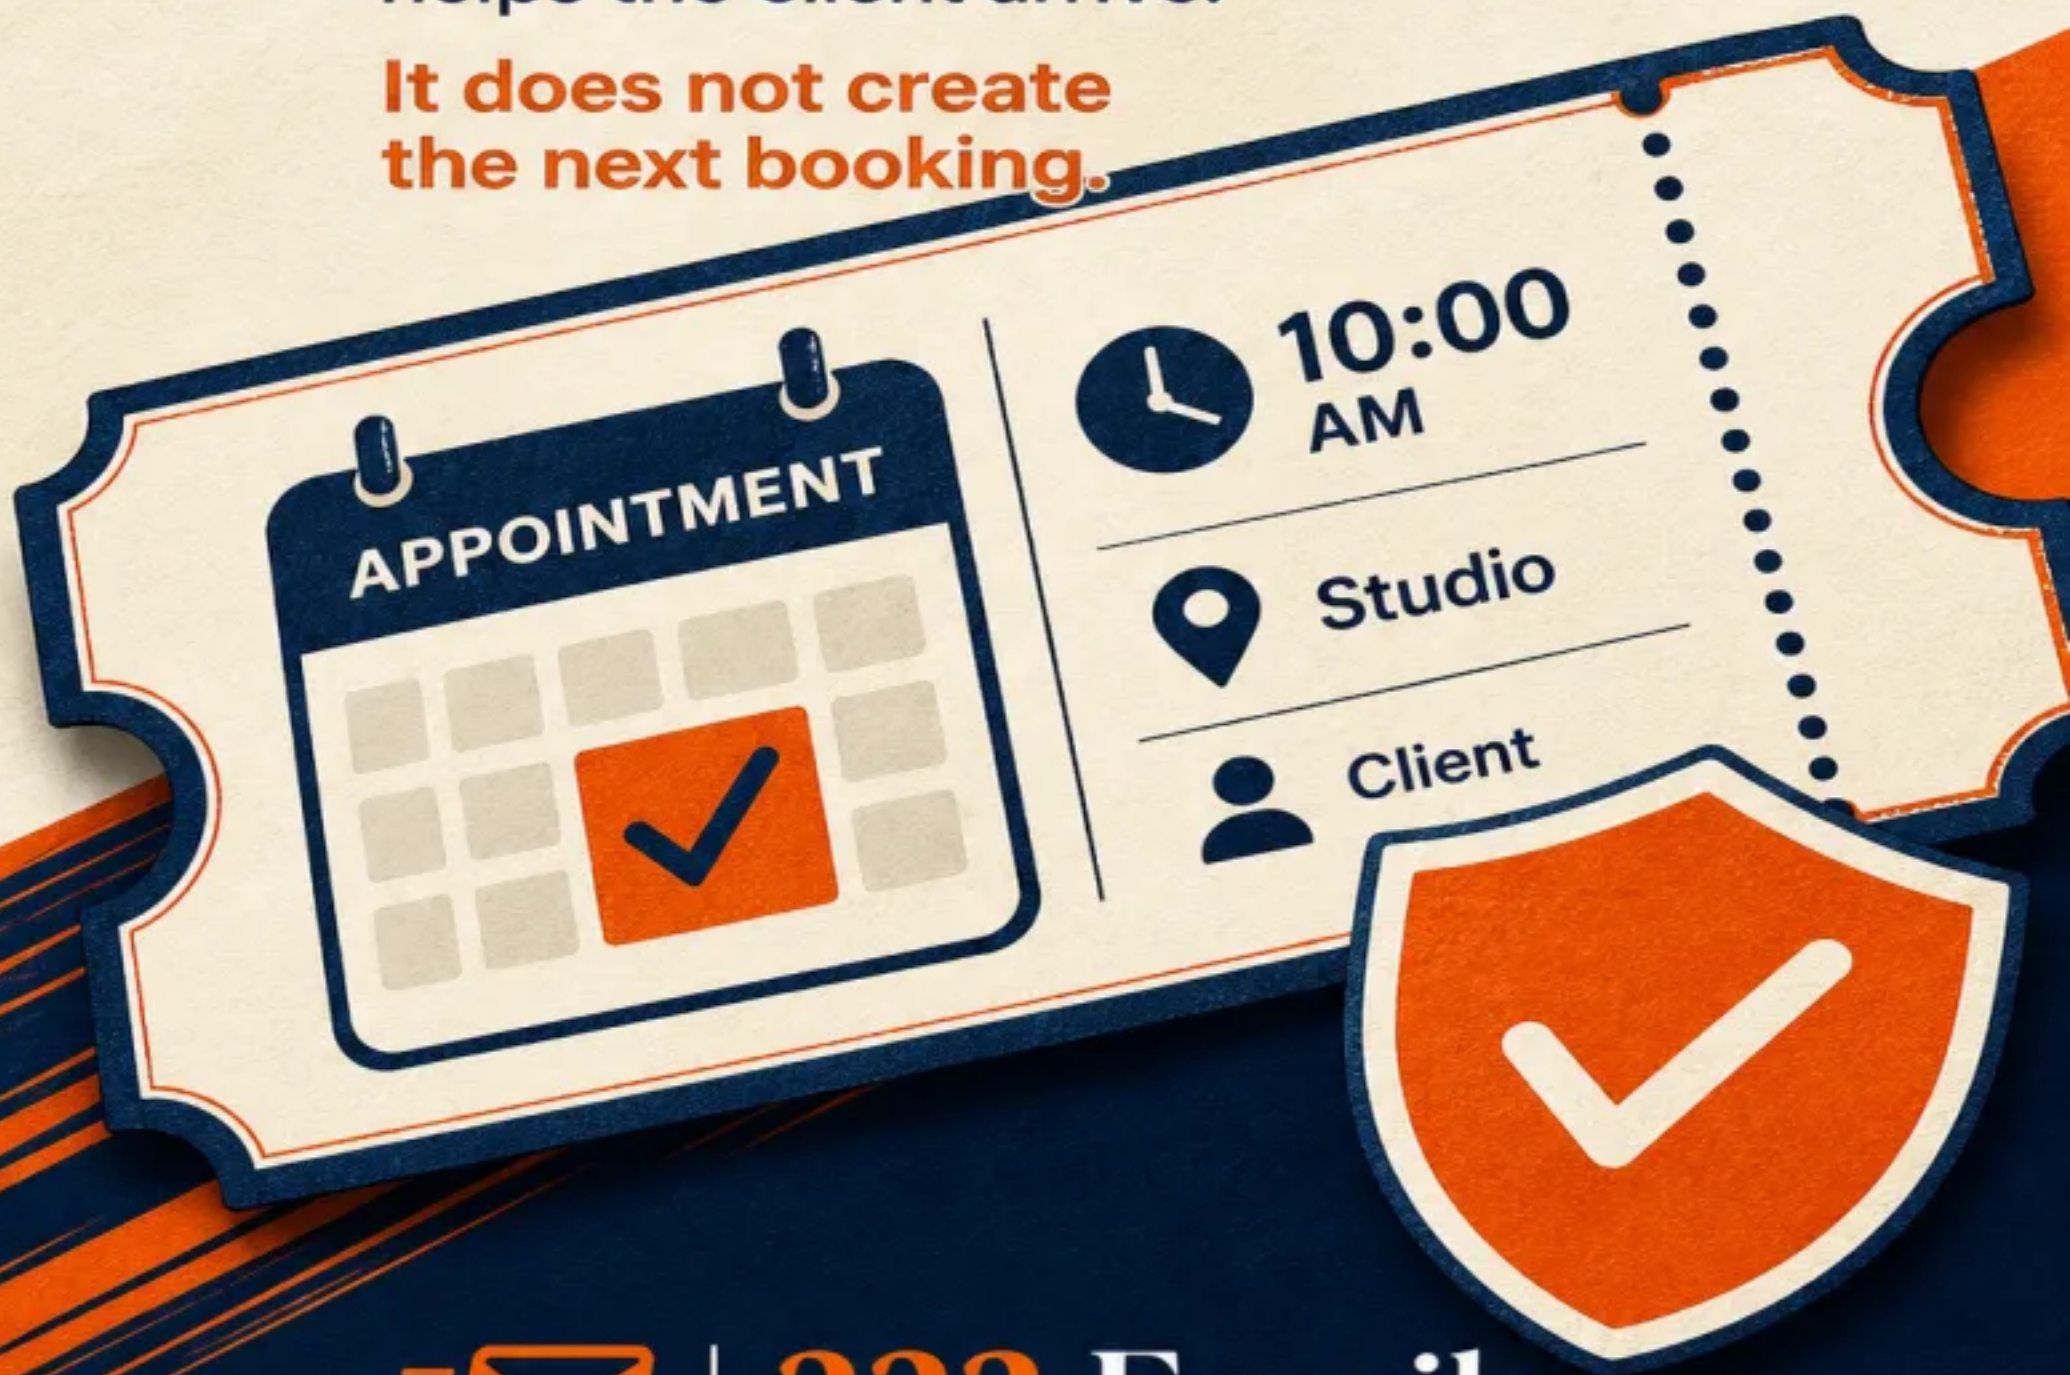

A reminder protects today's appointment. Rebooking creates the next one.

# 1. A reminder protects an appointment already booked

It confirms the time, reduces confusion and helps the client arrive.

**It does not create the next booking.**

=>  | **222** Emails

# 2.

## A rebooking email creates a route back

It follows the visit with a clear reason and an easy next step.

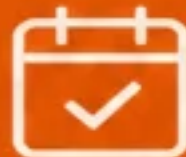

# 3. The timing changes the job

## BEFORE THE VISIT

Reminder: protect the booking

## APPOINTMENT

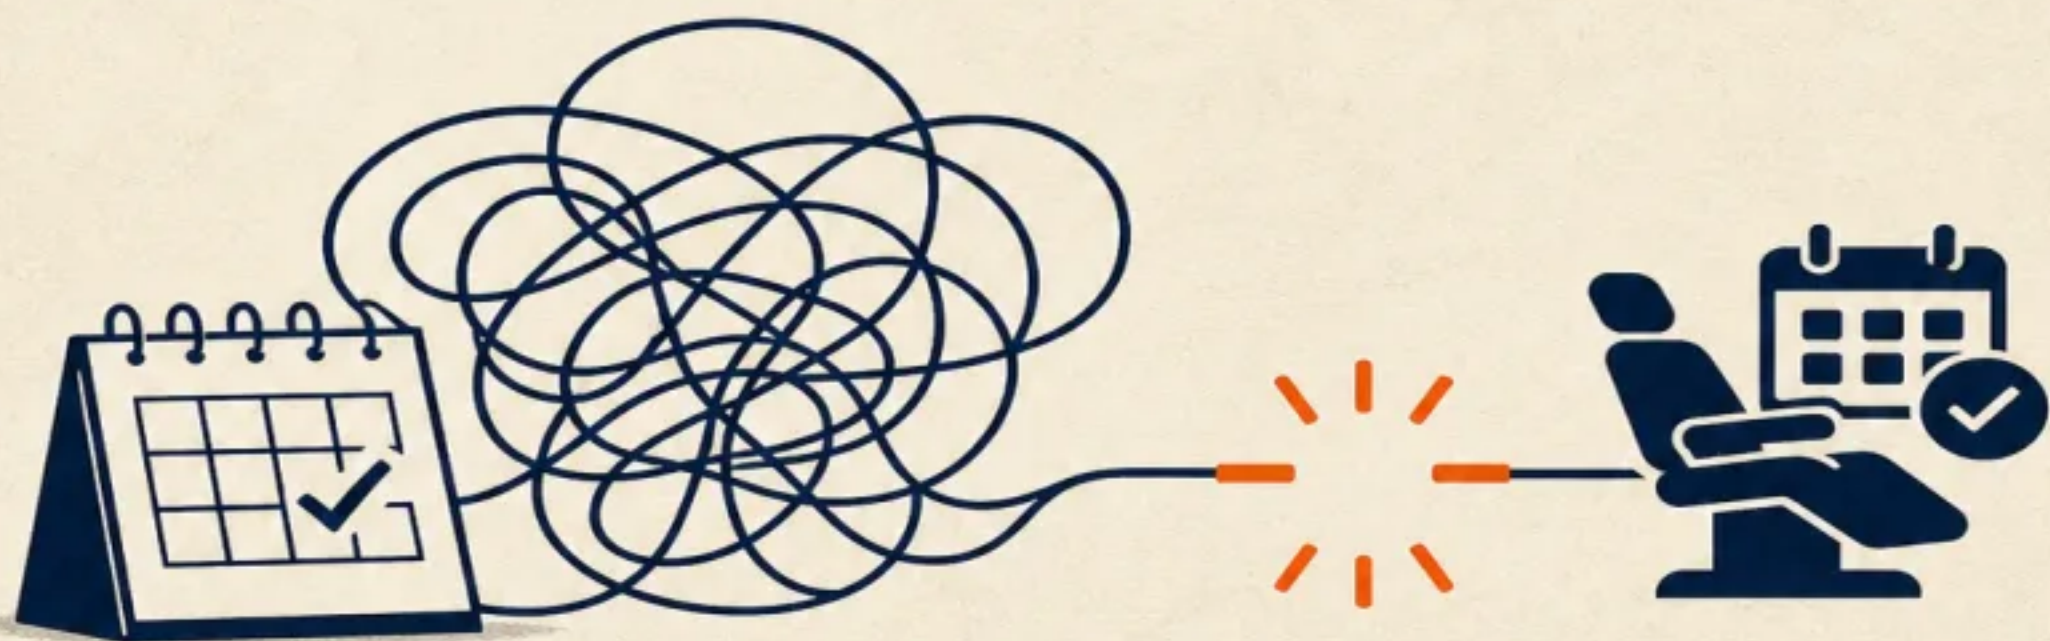

## AFTER THE VISIT

Rebooking: create the return

4.

If one message  
is doing both jobs,  
there is **probably**  
**a gap**

Your reminder may be  
working perfectly.

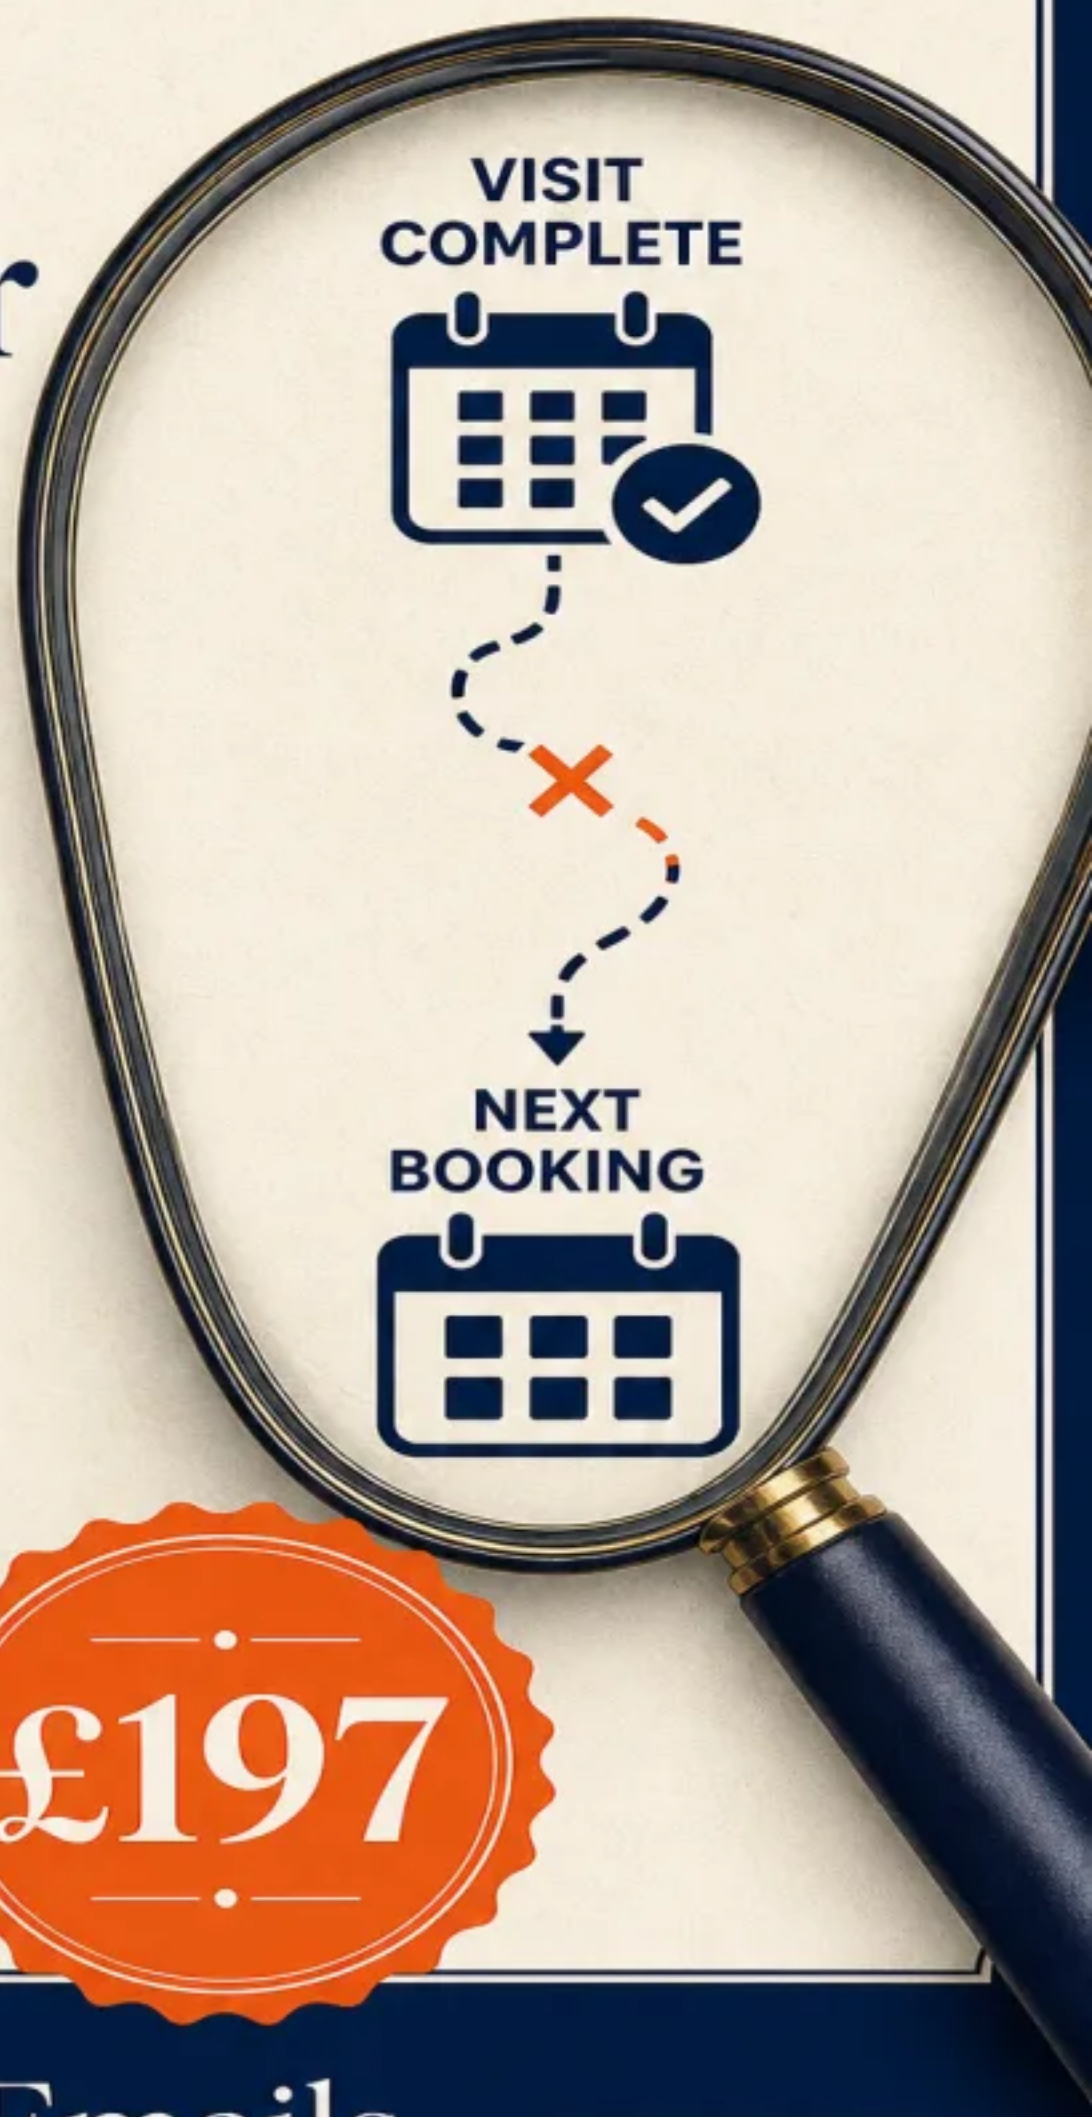

Your post-visit route  
can still be missing.

# Find the **missing** route after the appointment
